

J05 Tiger Olis Bahari ITAI 1370 2026 Summer

Houston Zoo has decided to use machine learning, deep learning, and other AI technologies to make the zoo, its members, its residents, and visitors more intelligent.

Houston Zoo had a small budget to assess the next technology in their system, so they decided to hire students like us for an internship to help them.

Tiger Team members Jose, Eric, Tyyotalle, and Olis attended an interview and were hired.

Houston Zoo, formerly known as Herman Park Zoo, opened in 1922 with 40 animals. By 2026, it will be housed with 4,300 animals. The zoo has more than 2 million visitors every year.

Houston Zoo is partnered with Baylor College of Medicine to develop a vaccine for Asian elephant disease.

It used to be part of the City Park department, and now the nonprofit Houston Zoo Inc. operates it

In 2000, the Children's Zoo was opened and named for donor John P. McGovern.

Most of the buildings and projects were supported by donations from the following entities: Fondren Functions, McGovern family, McNair family, and Wortham, and we thank all of them for their financial contributions.

One of the ducks saw Tyyotalle, our Ninja team member, and fainted and Adios Amgios and we wish the best for him in the heaven.

Olis set up our AI equipment, hardware, and software to work with monkeys first. Monkeys made Olis mad and Monkeys taught him a good lesson in Machine Learning and Olis was taken to Houston Animal Hospital and the Animal said Olis is Ok but Olis cannot work with Monkeys anymore.

Eric set up his equipment to collaborate with bears and Eric was making fun of Bears and Bears did something to Eric and Eric was taken to Animal Hospital and the animal doctor said Eris is OK but he cannot work with bears anymore.

Jose was collaborating with Asian elephants who had health issues. Jose was the only member of Tiger did not have any issue with them.

Jose took leadership of the Tiger team, while Olis and Eric worked with other easy and calm animals.

Team Tiger's work during the internship was successful, and Mr. Brown, our instructor, is proud of the team.

We are not Paper Tiger Team anymore; we are the real Tiger now. Please let us continue working as interns with the Houston Zoo.
